

TECHNOLOGY & MARKET ANALYST | POWER ELECTRONICS

With offices in France, Germany, Japan, Greater China and the U.S.A, Yole Développement (Yole) the « More than Moore » company, provides market research, technology analysis, strategic consulting, media services and financial services to a worldwide customer base.

Covering emerging and disruptive silicon and micro manufacturing markets, the group supports companies, investors and R&D organizations by delivering comprehensive analysis that helps them understand the market and technology trends critical to their business.

JOB DESCRIPTION

Our company proposes an immediate opening for a **Technology and Market Analyst** position to strengthen our **Power Electronics activities** by performing market, technology, and strategic analysis.

You will work in close collaboration within the Power & Wireless team with our Power Electronics analysts as well as our Compound Semiconductors & RF analysts. You will also take part in the projects of the other Divisions (Semiconductor, Memory & Computing and Photonics & Sensing) if needed.

Regular business trips (Europe, USA, Asia) are expected. The position would be ideally based in Villeurbanne, France (HQ), but remote is possible

YOUR RESPONSABILITIES

As a Power Electronics Analyst, you will be responsible to:

- Perform market, marketing, technical and strategic analyses,
- Oversee technology and industry insights from devices (IGBT, Silicon MOSFET, SiC MOSFET, GaN HEMT, Rectifier, Power management IC, ...) and/or converter to final applications (renewables, electric vehicle, consumers, automotive, SMPS for telecom, rail, UPS ...),
- Understand the impact of the emergence of new or improved technologies on these domains,
- Execute projects within a given timeframe and budget,
- Establish and manage customers relationships worldwide as well as identifying opportunities and bringing technical expertise to close deals for custom analyses,
- Participate in dedicated trade shows worldwide and giving presentations at international conferences and workshops.

EDUCATION / EXPERIENCE

- A first experience in Power Electronics (2/3 years) is demanded.
- University Degree (Master, Engineer, PhD) in Power Electronics is mandatory
- Marketing or related business development experience / training would be a plus
- Required English level: minimum CECR - C1
- Proficiency in French and Chinese would be a plus.
