

## TECHNOLOGY & MARKET TRAINEE ANALYST

### MEMORY

With offices in France, Germany, Japan, Greater China and the U.S.A, Yole Développement (Yole) the « More than Moore » company, provides market research, technology analysis, strategic consulting, media services and financial services to a worldwide customer base.

Covering emerging and disruptive silicon and micro manufacturing markets, the group supports companies, investors and R&D organizations by delivering comprehensive analysis that helps them understand the markets and technology trends critical to their business.

### INTERNSHIP DESCRIPTION

Our company proposes a 6 months internship for a **Market and Technology Trainee Analyst** to help us further develop our **Memory activities** by performing state of the art, understanding process flow, with a deep focus on material and technical equipment.

You will work in close collaboration within the Semiconductor, Memory & Computing Division, and high technical Analysts.

Location: position based in Villeurbanne, France (Headquarter).

### YOUR ROLE & OBJECTIVES

During your training course, you will be in charge of :

- Overseeing technology and industry insights from Memory market trends, from devices to package type with a focus on materials.
- Understanding the impact of the emergence of new technologies in various applications.
- Participating in market studies and marketing studies in the field of materials / memories.
- Learning to execute projects within a timeframe given by your Manager.
- Interviewing international industrial players (Europe, North America, Asia) to collect / discuss market, technical, economic, and financial data.
- Interacting with the laboratory of System Plus Consulting (Sister Compagny) specialized in reverse engineering and reverse costing.
- Giving technical presentations to the team during the weekly Team Meetings.
- Reporting to your Manager.

### EDUCATION / EXPERIENCE

- Graduate Diploma (Master, Engineer, PhD) in material, memory or semiconductor-related field is mandatory.
- A first experience in memory / material characterization and nanofabrication will be appreciated.
- Strong interest in product market entry / applications (marketing, strategic planning, etc.).
- Required English level: minimum CECR - CI / TOEIC 800.
- Proficiency in French and Chinese would be a plus.
