### **For immediate release:**

The Swedish SiC Power Center and Yole Développement announce their collaboration for the 2<sup>nd</sup> time:

## **International SiC Power Electronics Applications Workshop from May 29 to 30, 2012 – Stockholm, Sweden**

*Dec. 20, 2011 - The Swedish SiC Power Center, Enterprise Europe Network and Yole Développement are glad to announce for the 2nd time, their collaboration on the workshop International SiC Power Electronics Applications. ISiCPEAW 2012 is a two day event on the latest results and innovations on the use of Silicon Carbide technology in power electronics applications.*

From May 29 to 30, international experts will meet in Stockholm to share their expertise, recent developments and vision of SiC electronics applications. In 2011, the workshop attracted more than 200 attendees from all around the world and we expect no less in 2012. This event also includes an exhibition area and networking opportunities with business-to-business (B2B) matchmaking.

This event will take place at Kista Science Tower, Stockholm, Sweden.

### **The workshop**

The overall aim of the workshop is to promote the use of the latest silicon carbide research and development results by bringing together the foremost experts from both academia and industry. The focus is on the use of SiC technology in power electronics applications, components, modules, packaging, reliability and benchmarking versus silicon power electronics. The program will be defined by SiC experts and reflect the status of SiC from an industry point of view. Specialists from all over the world will present their view on the current status, ongoing development and the opportunities of applications in the power electronic area. They will present the latest products and solutions and will be available for detailed technical discussions.

### **The exhibition**

More than just a conference, the workshop ISiCPEAW includes debates and numerous networking times all along the days. The Swedish SiC Power Center, Enterprise Europe Network and Yole Développement also set up an exhibition area dedicated to the experts of the SiC industry.
